MADE IN ITALY

# MODIFICATION KIT FOR SHAKING LEGS OF BRAUD TOWED-BEHIND GRAPE HARVESTERS

*Developed by LaCruz®*

**MODIFICATION KIT FOR SHAKING LEGS** developed by LaCruz® improves the harvesting performance of the grape harvesters. Besides improving the capacity of the machine, it also improves the quality of the harvesting process, by safeguarding the vines and reducing the defoliation effect on plants.

## WHY CHOOSING THE LACRUZ MODIFICATION KIT

The connecting system between the two shaking legs developed by LaCruz entails a lot of advantages:

- it synchronizes the movement of the columns;
- it reduced the "lash" effect on the plants;
- it diminished the defoliation effect and damage on the vines;
- it reduces the quantity of stalks in the harvested product;
- it increases the harvesting speed;

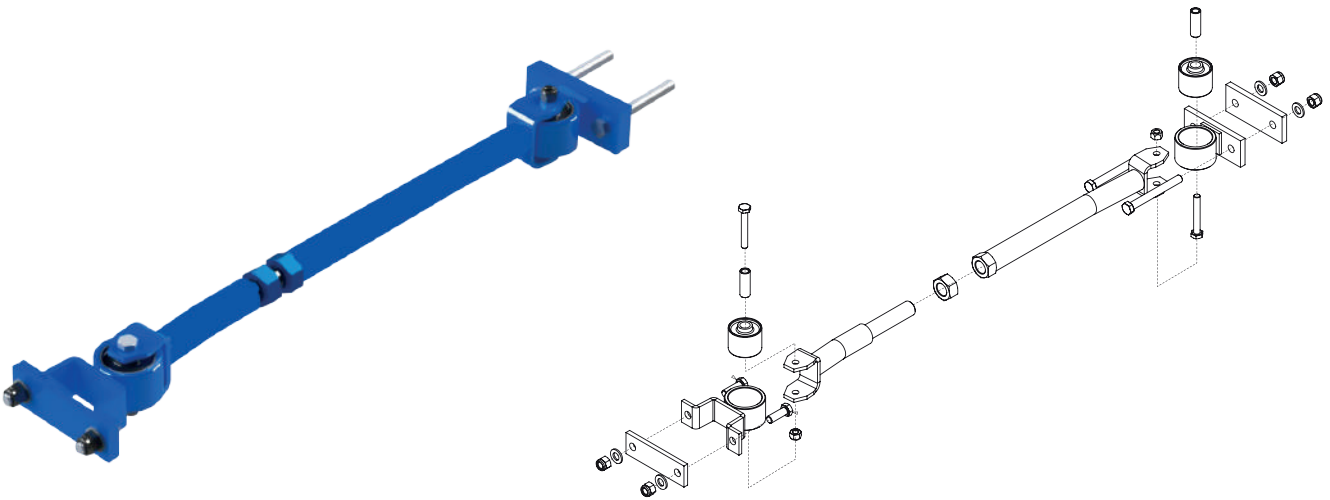

## KIT COMPONENTS

### FOR CONNECTING FRONT AND REAR LEG

**BRTBBRA** Modification kit: connecting arm for shaking legs with rubber joints.  
This system lets you synchronize the shaking legs movement and reduce the defoliation effect on plants.
