

BLOW OUT

GRASS SILAGE SPREADER

CELIKEL

We offer the best solutions to meet the needs of our customers. We are well-known in Turkey and many other countries because of our innovative approach to work. We encourage our clients to set the most audacious goals. Having realized the potential needs, we apply our cutting-edge technologies and methods to design the next generation machines FOR PROFESSIONALS.

**THE BLOW OUT SERIES COMBINES INNOVATIVE
DESIGN AND FUNCTIONALITY TO DELIVER
SUPERIOR PERFORMANCE, ENABLING YOU TO
ACHIEVE THE BEST POSSIBLE SILAGE QUALITY
FOR YOUR LIVESTOCK**

Achieving consistent and high-quality silage is crucial in the fermentation process, yet proper distribution and compaction to the edges of the bunker silo are often overlooked. Recognizing this challenge, CELIKEL presents the Blow Out series, a silage spreader designed to address these specific needs.

The Blow Out silage spreader ensures even distribution of feed piles towards the front, offering an effective solution, particularly when dealing with large unloading quantities. By utilizing advanced technology, CELIKEL has created a machine that optimizes the silage-making process, ultimately resulting in improved feed quality.
