### John-Deere engine

- Engine 145 Cv 4 cyl.
- Engine 170 Hp 4 cyl.
- Engine 170 Hp 6 cyl.
- Engine 200 Hp 6 cyl.

### FPT (Fiat Power-Train) engine

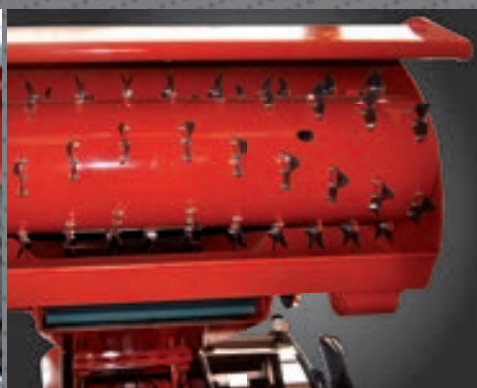

- Engine 140 Cv 4 cyl.
- Engine 170 Hp 4 cyl.
- Engine 175 Hp 6 cyl.
- Engine 238 Hp 6 cyl.

Gearbox of the augers, no extraordinary maintenance is required.  
2 rear wheels drive with hydraulic locking.  
2 front steering wheels.

- Silage cutter:
  - two directions of rotation
  - power 100 HP
  - working width 2 meters
  - 144 Knives
  - cutter protection hydraulically reversible
  - diameter of 72 cm.

- Unloading with belt is standard fitted on the front left side.
- Possibility of different unloadings with belt or without belt, front or rear.
- Fuel tank capacity 120 or 180 liters.
- Two hydraulic counter-knives (standard).

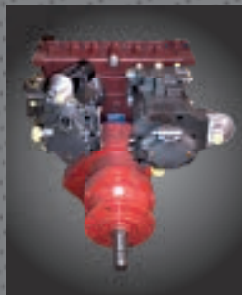

Maxi version has been created to have big capacity with 2 verticals augers, 26-28-30 m<sup>3</sup>.

Main differences:

- Wider diameter of the augers.
- "Power-shift" transmission (2 speeds rotation of the augers) standard, to start easy the mixing and makes enterly empty the tank.

Standard transmission to the augers for RE range.

Power-Shift transmission for RE range.

Power-Shift transmission for MAXI range.
